SRICHARAN SURAKANTI

Hyderabad, Telangana, India • +91 7032511447 • surakantisricharan8@gmail.com • Portfolio • GitHub • LinkedIn

PROFESSIONAL SUMMARY

Results-driven AI & NLP Engineer with hands-on experience developing and deploying end-to-end Deep Learning architectures, Explainable AI (XAI) frameworks, and intelligent automation systems. Proficient in PyTorch, TensorFlow, FastAPI, and NLP pipelines (BiLSTM, 1D-CNN, TF-IDF). Demonstrated track record of translating machine learning research into production-ready microservices, achieving up to 96.2% classification accuracy and reducing service response latency.

EDUCATION

Bachelor of Technology (B.Tech) - Computer Science & Engineering (AI & ML) **Expected May 2027**
Malla Reddy University | Hyderabad, Telangana CGPA: 8.06 / 10.0

PROFESSIONAL EXPERIENCE

AI Engineer | Laventra Technologies LLP March 2026 – October 2026 | Hyderabad, India

- Engineered core components of Render Reply, an AI-driven automation platform streamlining response generation and boosting customer engagement by 35%.
- Architected scalable microservices integrating intelligent recommendations, automated dialogue generation, and custom NLP chatbots.
- Integrated real-time sentiment analysis and automated reply synthesis, decreasing customer support response latency by 45%.

AI Virtual Intern | EduSkills Foundation January 2026 – March 2026 | Remote

- Built and evaluated supervised and unsupervised machine learning models using Scikit-Learn, Pandas, and NumPy for predictive analytics across enterprise datasets.
- Executed comprehensive exploratory data analysis (EDA), feature engineering, and cross-validation pipelines, improving baseline model accuracy by 18%.
- Implemented data preprocessing, anomaly detection, and automated report generation to extract actionable business insights.

KEY TECHNICAL PROJECTS

VeritasAI: Fake News Detection Platform [Source Code] [Live Deployment] Python, BiLSTM, 1D-CNN, FastAPI, XAI

- Architected a production-grade Fake News Intelligence Platform leveraging BiLSTM + 1D-CNN dual ensembles, classifying deceptive content at 96.2% accuracy.
- Implemented Explainable AI (XAI) token-attention visualization to highlight deceptive triggers, alongside an automated web scraper and linguistic forensics for clickbait scoring.
- Built and deployed a high-performance FastAPI backend featuring real-time social media threat monitoring and an interactive dark-mode dashboard.

HybridSense: 4-Class Sentiment Analysis (XAI) [Source Code] [Live Deployment] Python, TensorFlow, Deep Learning, NLP

- Developed an end-to-end Deep Learning & NLP platform expanding standard 3-class sentiment analysis into a 4-class classification paradigm (Positive, Negative, Neutral, Ambivalent) to resolve clause-level polarity conflicts.
- Integrated Explainable AI (XAI) attention heatmaps and feature attribution to deliver transparent, interpretable model predictions for complex sentiment shifts.

Automatic Keyword Extraction using NLP [Source Code] [Live Deployment] Python, Scikit-Learn, NLTK, TF-IDF

- Designed an automated machine learning-driven keyword extraction platform using Python, NLTK, and Scikit-Learn to parse and analyze unstructured academic research papers.
- Built an end-to-end NLP pipeline featuring text normalization, tokenization, lemmatization, and customized stop-word filtering, accelerating document indexing speed by 40%.

TECHNICAL SKILLS

Languages & Core: Python, Java, C/C++, SQL, Git, GitHub, RESTful APIs

Machine Learning & DL: PyTorch, TensorFlow, Keras, Scikit-Learn, BiLSTM, 1D-CNN, Ensembles, Predictive Analytics

NLP & Text Forensics: NLTK, TF-IDF, Tokenization, Lemmatization, Sentiment Analysis, Text Mining, Keyword Extraction

Explainable AI & Tools: XAI (Token Attention, Interpretability), FastAPI, Flask, Pandas, NumPy, Data Preprocessing
